COVID-19 Bivalent Booster

Frequently Asked Questions:

Who is eligible?

The bivalent boosters are available for people ages 5 and older who have received their primary series (2 doses of Moderna or Pfizer, 1 dose of J&J).

What does the bivalent booster do?

The updated (bivalent) boosters are called “bivalent” because they protect against both the original virus that causes COVID-19 and the Omicron variant, including subvariants A.4 and BA.5.

When can I get the updated booster?

Anyone who is eligible (see above) and has not received any primary series or booster dose of the COVID-19 vaccine in the past 2 months, should get their booster. If you tested positive for COVID-19 in the past, it is recommended that you also wait for at least 3 months since your COVID infection to receive the vaccine.

Can I get any type of COVID-19 vaccine for the booster dose?

Yes. The CDC stated that you can “mix and match” any of the available bivalent COVID-19 vaccines for your booster dose.

How many doses of the bivalent booster need?

Only a single booster dose is recommended at this time by the CDC.

What if I am immunocompromised?

If you are immunocompromised, it is even more important that you stay up to date with COVID boosters.

Can I get the COVID-19 bivalent booster AND the flu shot at the same time?

Yes – and it’s encouraged!
