The Kendall County Zoning Board of Appeals approved the following Findings of Fact and Recommendation at their meeting on October 28, 2019, by a vote of five (5) in favor and zero (0) in opposition. Chairman Mohr and Member Cherry were absent.

FINDINGS OF FACT-SPECIAL USE

§ 13.08.J of the Zoning Ordinance outlines findings that the Zoning Board of Appeals must make in order recommend in favor of the applicant on special use permit applications.

That the establishment, maintenance, or operation of the special use will not be detrimental to or endanger the public health, safety, morals, comfort, or general welfare. The operation of the special use will not be detrimental to the public health, safety, morals, comfort, or general welfare. The immediately adjacent properties are also zoned A-1. There are no existing structures on adjacent properties within one hundred feet (100') of the property line. Taking into account the residential properties to the west and southwest of the property, the proposed kennel location will be situated on the east end of the property, thereby well-exceeding the two hundred fifty foot (250') setback requirement from any residential district set forth in the Zoning Ordinance. In addition, the Petitioners have a waste management plan and have considered the impact of noise on surrounding properties. A six foot (6') tall fencing is planned around the outdoor play area. The Petitioners intend to follow the Kendall County Zoning Ordinance as it relates to having all pets inside by dusk.

That the special use will not be substantially injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish and impair property values within the neighborhood. The Zoning classification of property within the general area of the property in question shall be considered in determining consistency with this standard. The proposed use shall make adequate provisions for appropriate buffers, landscaping, fencing, lighting, building materials, open space and other improvements necessary to insure that the proposed use does not adversely impact adjacent uses and is compatible with the surrounding area and/or the County as a whole. As noted in the previous finding, the proposed special use will be setback further than the required setback for residentially zoned properties. The Petitioners plan to install a fence and security lighting. The Petitioners agreed to have animals indoors by sunset. The proposed of hours of operation will also prevent injury to neighboring land uses.

That adequate utilities, access roads and points of ingress and egress, drainage, and/or other necessary facilities have been or are being provided. This is true. An existing curb cut is already located off of Plainfield Road at the subject property. The Petitioners will have to secure applicable permits related stormwater, drainage, well, and septic systems.

That the special use shall in all other respects conform to the applicable regulations of the district in which it is located, except as such regulations may in each instance be modified by the County Board pursuant to the recommendation of the Zoning Board of Appeals. Provided that the variance is approved regarding distance to non-residentially zoned or use properties, the special use would conform to the applicable regulations of the district.

That the special use is consistent with the purpose and objectives of the Land Resource Management Plan and other adopted County or municipal plans and policies. True, the proposed use is consistent with an objective found on Page 6-34 of the Kendall County Land Resource Management Plan which calls for "a strong base of agricultural, commercial and industrial uses that provide a broad range of job opportunities, a healthy tax base, and improved quality of services to County residents" through the encouragement ". . . of locally owned businesses."

FINDINGS OF FACT-VARIANCE

§ 13.04.A.3 of the Zoning Ordinance outlines findings that the Zoning Board of Appeals must make in order to grant variations.

That the particular physical surroundings, shape, or topographical condition of the specific property involved would result in a particular hardship or practical difficulty upon the owner if the strict letter of the regulations were carried out. The subject property is triangular in shape and combined with its size of approximately five (5) acres makes it difficult for any use to be greater than one hundred fifty feet (150') from any non-residentially zoned property.

That the conditions upon which the requested variation is based would not be applicable, generally, to other property within the same zoning classification. The configuration of this property is unique among A-1 zoned properties. Most A-1 zoned properties are larger and more rectangular in shaping than the subject property giving them more space for uses to be away from non-residentially zoned property.

That the alleged difficulty or hardship has not been created by any person presently having an interest in the property. The Petitioners did not create the configuration of the subject property.

That the granting of the variation will not materially be detrimental to the public welfare or substantially injurious to other property or improvements in the neighborhood in which the property is located. Provided the site is developed as proposed, the granting of the variation will not be detrimental to the public welfare or substantially injurious to other property or improvements in the neighborhood.

That the proposed variation will not impair an adequate supply of light and air to adjacent property, or substantially increase the congestion in the public streets or increase the danger of fire, or endanger the public safety or substantially diminish or impair property values within the neighborhood. Provided all applicable permits are secured, no threats to public safety should arise. The proposed use will not cause an impairment of light or air to adjacent property. Increased traffic congestion is not anticipated. If developed as proposed, property values should not be impaired.
